## DO MORE WORK IN LESS TIME...

**WITH THE NEW FACILITIES/ENGINEERING CARRYALL 500.** It features dual-locking tool boxes, electric bed lift, dual ladder rack and 2-inch receiver for hauling trailers. These accessories improve versatility, and let your crews move seamlessly from job to job.

**ROLL RIGHT THROUGH ANY TO-DO LIST** Your new Facilities-Engineering Vehicle will arrive on your site ready to work with:

- Dual steel side-access tool boxes and rear tailgate
- Electric bed lift for easy maintenance
- Dual ladder rack with tie downs
- Halogen headlights
- 12-volt powerport and lockable glove box
- 5-panel mirror, side reflectors and rear safety triangle
- Front brush guard and rear fender guards
- Rear 2-inch receiver

**PICK-UP TRUCK PERFORMANCE. UTILITY VEHICLE PRICING.** The vehicle is built on the renowned Carryall 500 utility vehicle platform. It does the work of a small pick-up truck at a fraction of the cost thanks to its powerful 14-hp-rated single-cylinder overhead cam engine with electronic fuel injection. The engine delivers superior power and torque, yet it cuts fuel consumption by 50% compared to some competitive models.

The electric model is powered by 48-volt system and 500-amp DC motor controllers with controlled downhill ability, zero-speed detect to prevent roll away, regenerative braking, hand-held speed programmability and diagnostic capabilities. Smart onboard chargers issue alerts to prevent common user errors, and reel retractors allow for “opportunity charging.”

The vehicle’s rustproof aircraft-grade aluminum frames withstand road salt, fertilizers, water and lawn chemicals often used on campuses, resorts and government complexes. Standard color is dark gray body with gray seats. Optional colors are available.
